1. SUMMARY OF ACTIVITIES: [REDACTED] 27 had one [REDACTED] sortie which was a short ferry and seven T-33 sorties with the emphasis on instrument flying practice. Some undue back trouble restricted the flying activity of this pilot for the latter part of the month. In common or garden language it has been initially diagnosed as a "slipped disc".

[REDACTED] 28 had two [REDACTED] training sorties and four T-33 sorties.

The general activities of the [REDACTED] detachment have increased all round since the introduction of ferry flights. Apart from the individual sorties conducted by [REDACTED] pilots, extra duties are being carried out connected with mobile, P.E., medical etc., This has at least imparted to us the feeling that we are not exactly marking time.
